

Model 450

Press Marking

PRODUCT FEATURES

- Smooth and Quiet Operation
- Produces Clear, and legible mark
- No electrical requirements
- All Controls Pneumatic
- Anti-Tie-Down dual palm button controls
- Base plate configured to accept standard Schmidt tooling

The Squeeze Action Presses, bench and floor models, with 5 to 15 tons of marking pressure, eliminate impact and reduce noise.

Schmidt's squeeze action presses provide an alternative marking choice in applications, where impact could be damaging.

By comparison to impact presses, these units offer reduced stress for the parts being marked and less wear on the tooling in the machine. There is no impact, or bounce as the marking pressure is delivered in a straight, smooth squeeze.

Schmidt offers the economical bench-style Model 450 in four sizes. These heavy duty pneumatic presses deliver uniform pressure regardless of variations in the thickness of parts being marked.

Specifications and dimensions are shown on back.

Permanently mark identification numbers and logos on your parts.
