

# NAMEPLATE DETAIL PRESSES

MODEL 4

MODEL 6

## SYSTEM FEATURES

- Manually operated, portable bench-top design comes in two machine sizes
- Marks clear, easy-to-read numbers and letters with one short lever stroke.
- Great for marking nameplates, metal tags, dog tags and pet ID tags.
- Easily stamps into aluminum, brass, stainless steel\* and some plastics
- Four (4) sharp face character size marking dials are available: 3/32", 1/8", 3/16" and 1/4".
- Marking dials are interchangeable and fit both the Model 4 and Model 6.
- Machines, additional marking dials, and replacement parts are available to purchase at [www.gtschmidt.com](http://www.gtschmidt.com)

SCHMIDT manufactures two manual nameplate marking machine presses, the Model 4 and Model 6. These machines are perfect for stamping into name plates, metal tags, dog tags and ID tags.

The Model 4 and Model 6 mark evenly spaced letters and numbers that are accurately aligned and uniformly deep.

The machines are virtually identical except for the size of name plates they can handle. The smaller Model 4 accepts plates up to 4" deep, while the larger Model 6 can handle plates up to 8" deep.

Both machines use the same sharp face character dials. Each marking dial has 40 characters - A through Z (upper case), 0 through 9, slash (/), dash (-), period (.) and an ampersand (&).

Marking dials come in four different character sizes, 3/32", 1/8", 3/16" and 1/4". All dials are interchangeable and fit both the Model 4 and Model 6. Additional dials can be purchased separately.

The Model 4 and Model 6 can be used to mark on all materials - steel, brass, stainless steel\*, aluminum, and some plastic.
